

AMIR SIDDIQUI

**COVID-19 Programme Coordinator -
Primary Care Network**

PROFESSIONAL DATA

 4 years in COVID-19 vaccination programmes, recently transitioned to routine work

 North West England

 Primary Care Network / COVID-19 Vaccination Hub

ROLE & BACKGROUND

- Started in emergency COVID response; now coordinator for local PCN
- Manages vaccine ordering for 8 GP practices in PCN
- Transitioned from temporary to permanent NHS role
- Works with vaccination teams across multiple locations
- Gained practical ImmForm knowledge during COVID surge

GOALS & DESIRED OUTCOMES

- Secure permanent, individual access to ImmForm for PCN vaccine coordination
- Establish standardised ordering process across 8 practices
- Maintain overview of vaccine stock across network
- Support transition from emergency to routine immunisation services

WANTS & NEEDS

- Permanent account status reflecting permanent NHS role
- Quick registration reflecting existing ImmForm knowledge
- Access that isn't tied to single approver (resilience)
- Monthly reporting on vaccine orders and utilisation
- Clear communication about policy changes affecting vaccine ordering

PAIN POINTS & FRUSTRATIONS

- Started on temporary emergency access; now needs permanent setup
- Current account structure doesn't reflect PCN coordinator role
- Manual registration seems unnecessary given existing usage
- Worries about approval delays affecting vaccine availability
- Lacks clear record of ordering history for audit purposes

COLIN RAFFERTY

**Occupational Health Coordinator -
Occupational Health Service**

PROFESSIONAL DATA

 12 years in occupational health including vaccine and travel health programmes

 Midlands

 Occupational Health Services

ROLE & BACKGROUND

- Manages occupational health vaccine programmes for large NHS trust
- Provides travel health and routine immunisation services
- Works with 5 occupational health nurses
- Handles 300+ vaccine consultations per year
- Experience with multiple digital health systems

GOALS & DESIRED OUTCOMES

- Streamline vaccine ordering for occupational health programme
- Ensure compliance with occupational health vaccine guidance
- Maintain detailed records of who received which vaccines and when
- Support team growth without creating new access bottlenecks

WANTS & NEEDS

- Transparent, documented registration process
- Registration portal that explains why information is needed
- Approval from identifiable individual, not generic helpdesk
- Ability to add team members after initial registration
- Integration with trust email systems for verification

PAIN POINTS & FRUSTRATIONS

- Manual process is slow for a time-sensitive health service
- Each team member change requires full re-registration cycle
- Current system doesn't support delegation or backup access
- No clear escalation path if approvals get stuck
- Paper trail is difficult to audit for compliance purposes

DONNA EZE

**Mpox Specialist Nurse - Infectious
Disease Service**

PROFESSIONAL DATA

 15 years in infectious disease nursing; 3 years managing Mpox vaccine programme

 London

 Infectious Disease Service / Mpox Vaccination Programme

ROLE & BACKGROUND

- Led development of local Mpox vaccination programme
- Manages vaccine ordering and clinical delivery
- Works with sexual health clinics, GUM services, and community partners
- Trains other clinicians on Mpox vaccine protocols
- Established good relationships with ImmForm support team

GOALS & DESIRED OUTCOMES

- Maintain reliable vaccine supply for Mpox prevention programme
- Support expansion of vaccination to community partners
- Ensure accurate records of vaccine stock and utilisation
- Share best practice on Mpox ordering across region

WANTS & NEEDS

- Fast-track registration reflecting programme lead status and experience
- Support for adding partner organisations as authorised users
- Regular stock notifications and reorder reminders
- Benchmarking data on regional Mpox vaccine uptake
- Direct escalation contact for urgent supply issues

PAIN POINTS & FRUSTRATIONS

- Current registration process doesn't reflect programme coordinator role
- Cannot easily grant access to partner organisations
- Manual process delays vaccine delivery when stock runs low
- No visibility into other services' Mpox vaccine orders
- Approval delays have previously caused stock shortages

KEISHA MENSAH

Sexual Health Administrator - Sexual Health Service

PROFESSIONAL DATA

-  5 years in sexual health services administration and immunisation coordination
-  Greater London
-  Sexual Health Service / Immunisation Team

ROLE & BACKGROUND

- Works in dedicated sexual health service in urban area
- Manages HPV and other immunisation programmes for 3+ clinic locations
- Coordinates with 8 clinical staff and 2 consultants
- Recently joined team; still getting up to speed on ImmForm
- Currently shares access via clinic manager's account

GOALS & DESIRED OUTCOMES

- Gain independent ImmForm access for clinic vaccine ordering
- Maintain clear audit trail for HPV and other sexual health vaccines
- Support vaccine programme expansion across multiple clinic sites
- Reduce dependency on clinic manager for routine ordering

WANTS & NEEDS

- Clear guidance on account numbers and organisation codes for each clinic
- Ability to request access quickly when starting new role
- Notification when orders are fulfilled
- Option to delegate to backup staff during leave periods
- Mobile-friendly access to check vaccine stock

PAIN POINTS & FRUSTRATIONS

- Doesn't yet know the correct ImmForm account numbers for clinic locations
- Current PDF form process feels outdated for a modern NHS service
- Cannot access system independently; creates bottleneck for clinic
- Approval delays mean vaccine shortages when clinic runs low on stock
- No training provided on ImmForm as part of onboarding

PRIYA CHANDRASEKARAN

Vaccination Coordinator - GP Practice

PROFESSIONAL DATA

- 8 years managing immunisation programmes across primary care
- South West England
- GP Practice / Immunisation Services

ROLE & BACKGROUND

- Manages vaccine ordering for 12,000-patient GP practice
- Been in practice for 8 years, started as receptionist
- Coordinates with 4 practice nurses and 2 GPs on immunisation schedules
- Currently handles ImmForm access via delegated GP account
- Processes 200+ vaccine orders per year across seasonal flu, COVID-19, and routine programmes

GOALS & DESIRED OUTCOMES

- Get faster access to ImmForm for her team without waiting for GP approval
- Reduce administrative burden of managing account changes
- Have visibility into vaccine stock levels and ordering history
- Ensure compliance with UKHSA vaccine ordering guidelines

WANTS & NEEDS

- Simple, clear registration process that doesn't require IT support
- Email confirmation that her application has been received
- Quick approval turnaround (2-3 days preferred)
- Individual user account rather than shared practice account
- Audit trail of who ordered what and when

PAIN POINTS & FRUSTRATIONS

- Currently waits 5-7 days for account approval via manual PDF process
- Cannot order vaccines when the authorised person is on leave
- Manual form-filling is error-prone; re-keying data creates mistakes
- No visibility into application status while it's being processed
- Shared account access means no accountability for individual vaccine orders

MARCUS OBI

**Procurement and Compliance Lead -
Authorised Wholesaler**

PROFESSIONAL DATA

 10 years in pharmaceutical procurement and supply chain compliance

 South East England

 Authorised Wholesaler / Procurement Operations

ROLE & BACKGROUND

- Works for licensed authorised pharmaceutical wholesaler
- Manages vaccine procurement and distribution to NHS sites
- Responsible for regulatory compliance and audit trails
- Coordinates with MHRA and wholesaler management
- Manages 20+ vaccine product lines and SKUs

GOALS & DESIRED OUTCOMES

- Maintain compliant, auditable ordering process for vaccine procurement
- Support wholesaler's NHS supply chain relationships
- Ensure traceability from order to delivery to end-user
- Scale operations without increasing administrative burden

WANTS & NEEDS

- Compliant digital registration that meets MHRA expectations
- Clear audit trail of all ordering transactions
- Approval from NHS stakeholders who understand wholesaler role
- Integration with wholesaler's compliance reporting systems
- Notifications of supply or regulatory changes affecting orders

PAIN POINTS & FRUSTRATIONS

- Current PDF process creates compliance gaps in audit trail
- Manual re-keying increases risk of ordering errors
- Non-NHS status sometimes causes confusion in registration process
- Approval timescales are unpredictable for supply chain planning
- No integration with wholesaler's internal systems creates duplicate data entry

SANJAY PATEL

Pharmacy Lead - Immunoglobulin
Holding Centre

PROFESSIONAL DATA

 18 years as pharmacist; 8 years managing immunoglobulin distribution centre

 West Midlands

 Immunoglobulin Holding Centre / Pharmacy Services

ROLE & BACKGROUND

- Licensed pharmacist managing dedicated immunoglobulin distribution service
- Serves 40+ NHS sites with specialist immunoglobulin products
- Manages temperature-controlled storage and complex logistics
- Responsible for product tracking and MHRA compliance
- Operates under strict pharmaceutical regulations

GOALS & DESIRED OUTCOMES

- Maintain secure, compliant immunoglobulin supply chain
- Ensure rapid response to NHS clinical emergencies
- Meet all MHRA and GDP (Good Distribution Practice) requirements
- Scale services without compromising traceability or compliance

WANTS & NEEDS

- Robust registration process that demonstrates competence and compliance
- Approval from NHS stakeholders familiar with immunoglobulin supply model
- Integration with patient-level traceability requirements
- Notification system for urgent supply requests or recalls
- Compliance-ready audit trail for MHRA inspections

PAIN POINTS & FRUSTRATIONS

- Current system doesn't adequately reflect specialist, regulated nature of role
- Manual processing risks breaking strict compliance chains
- Approval delays can impact clinical delivery of life-saving products
- No integration with pharmaceutical tracking systems
- Cannot delegate to backup staff if primary user is unavailable

LINDA FORSYTHE

Practice Manager and Authorised Person - GP Practice

PROFESSIONAL DATA

-  20 years in GP practice management; 12 years as Authorised Person for ImmForm
-  South West England
-  GP Practice Management

ROLE & BACKGROUND

- Practice manager for 15-partner GP practice
- Designated as Authorised Person for ImmForm account
- Manages 80+ staff including clinicians and administrative team
- Responsible for practice compliance and governance
- Has approved 200+ user registrations over 12 years

GOALS & DESIRED OUTCOMES

- Manage user access securely while supporting practice operations
- Maintain clear, auditable approval process
- Reduce time spent on access management tasks
- Support team flexibility without compromising security

WANTS & NEEDS

- Clear, structured approval process that documents decisions
- Time-bounded approval requests with escalation if delayed
- Visibility into who is accessing ImmForm account and when
- Easy way to revoke access if staff leave or change roles
- Integration with practice HR/staff directory systems

PAIN POINTS & FRUSTRATIONS

- Current email-based process creates cluttered approval trail
- No visibility into what access each person actually has
- Cannot easily track which staff have been approved
- Manual process is time-consuming; often deprioritised
- If approval is forgotten, staff are blocked from vaccine ordering

DAVID ACHEAMPONG

Helpdesk Operative - ImmForm Support
(Current State)

PROFESSIONAL DATA

 6 years in ImmForm helpdesk; formerly healthcare admin

 UKHSA National Office

 ImmForm Support Team / Helpdesk Operations

ROLE & BACKGROUND

- ImmForm support team member handling user registrations
- Processes 5-8 registration requests per day during peak periods
- Manually validates data, re-keys forms into ImmForm
- Chases approvals from Authorised Persons via email
- Works with users on account and organisation code validation

GOALS & DESIRED OUTCOMES

- Process registration applications quickly and accurately
- Reduce time spent on manual data entry and chasing
- Maintain compliance and audit trail for registrations
- Provide good support experience to healthcare users

WANTS & NEEDS

- Structured input from users with validated data
- Automated validation for account/organisation pairs
- Workflow system to track approval status
- Ability to see approval decision history
- Clear escalation path for complex cases

PAIN POINTS & FRUSTRATIONS

- Manual re-keying is repetitive, error-prone, and time-consuming
- Cannot easily follow up on delayed approvals
- Invalid account/organisation combinations cause rework
- No visibility into application status for users asking about progress
- Email-based chasing is inefficient; approvers don't always respond

FATIMA OSEI

**Case Handler - ImmForm Support
(Digitally-Assisted Fallback)**

PROFESSIONAL DATA

 3 years in ImmForm support; transitioned from manual helpdesk to assisted role

 UKHSA National Office

 ImmForm Support Team / Case Management

ROLE & BACKGROUND

- ImmForm support case handler; newer member of team
- Works on complex registrations and fallback cases
- Handles edge cases: shared mailboxes, invalid codes, approval delays
- Recently upskilled on digital-assisted case management
- Supports primary helpdesk operators on difficult applications

GOALS & DESIRED OUTCOMES

- Resolve complex registration cases efficiently and fairly
- Support users who face barriers with standard registration
- Maintain compliance while being flexible for edge cases
- Build expertise in handling difficult scenarios

WANTS & NEEDS

- Clear decision-making framework for edge cases
- Tools to verify identity and account details
- Access to Authorised Person contact information for escalation
- Digital workflow to track case status and decisions
- Training on regulatory requirements and compliance

PAIN POINTS & FRUSTRATIONS

- No standardised process for handling edge cases
- Limited tools to verify user identity and account details
- Depends on escalation to seniors for difficult decisions
- Manual tracking makes it hard to report on case outcomes
- Difficult users or unclear requirements can get stuck indefinitely

RACHEL THORNTON

Quality Assurance Lead and WDA
Responsible Person - UKHSA

PROFESSIONAL DATA

 14 years in UKHSA quality assurance and regulatory compliance; 8 years as WDA Responsible Person

 UKHSA National Office

 Quality Assurance / Regulatory Compliance

ROLE & BACKGROUND

- UKHSA Quality Assurance and WDA (Wholesale Dealer in Medicines) Responsible Person
- Responsible for regulatory compliance of ImmForm system
- Conducts audits of registration processes and user access
- Manages MHRA inspections and compliance reporting
- Ensures ImmForm meets GDP and traceability requirements

GOALS & DESIRED OUTCOMES

- Ensure ImmForm registration process meets MHRA and GDP requirements
- Maintain complete, auditable trail of all user lifecycle decisions
- Reduce compliance risk from manual processes
- Support UKHSA governance and regulatory reporting

WANTS & NEEDS

- System-generated audit trail of all registration decisions
- Clear evidence of identity verification for each user
- Documentation of Authorised Person approval decisions
- Regular compliance reporting and audit trails
- System alerts for any policy or compliance anomalies

PAIN POINTS & FRUSTRATIONS

- Manual email-based process creates gaps in audit trail
- No clear evidence of identity verification steps taken
- Difficult to demonstrate compliance during MHRA inspections
- Cannot easily report on user registration metrics
- Compliance risk from lack of structured data capture
